

MEMBER **2022** ABRIDGED PREMIUM DRUG LIST

For group HMO, PPO and EPO members with an insurance plan that includes a prescription drug benefit.

This abridged drug list is a list of drugs used to treat common conditions only and is maintained by the Medical and Pharmacy Management Committee of Blue Cross and Blue Shield of Kansas City. The committee is composed of practicing doctors and pharmacists within the Kansas City area. Quarterly meetings are held to evaluate new drug therapies and review drug utilization issues. It does not include all drugs covered by your benefit plan. For a complete list, visit MyBlueKC.com. Note that the abridged formulary listed below is not an all-inclusive list and is subject to change.

Excluded brand-name medications with generic equivalents

The brand-name medications below are excluded on the formulary. These brand-name medications have been identified as having available generic equivalents covered at Tier 1 on the formulary. Speak with your pharmacist to have your excluded brand-name medication substituted with its generic equivalent.

A generic medication contains the same active ingredient(s) as a brand-name medication. An active ingredient is what makes the medication work. For example, Lipitor® and its generic both contain atorvastatin, which reduces the amount of bad cholesterol in the blood. Brand-name medications are often protected by a patent. When the patent ends, drug companies can apply to the U.S. Food and Drug Administration (FDA) to begin making generic versions of the medication.
